Index of Subjects

ACTH, mammary secretion, initiation, goat, 179

Bacteria – *see* individual bacteria and types
Burgos cheese, from ewes' milk, composition, microbiological quality, 551

Camembert cheese, making, enzyme retention, influence of pH, enzyme, ultrafiltration, 315
Casein, genetic variants, renneting properties, milk, 479
  micelles, ethanol stability, calcium phosphate, role, 389
    heat-induced association–dissociation, 377
    size-fractionation, porous glass chromatography, 19
    size, effect of heating, added urea, 39
  mixtures, fractionation, fast protein liquid chromatography, 369
  nucleotide sequences (review), 447
  purification, goat milk, 361
α_{s1}-Casein, identification, goat milk, 361
κ-Casein, dissociation, milk proteins, heated, influence of colloidal, soluble salts, 523
    β-lactoglobulin, role, 509
Cheddar cheese, ripening, microflora, effect of elevated temperatures, 69
Cheesemaking – *see* **Havarti cheese**
Cheesemaking, curd – *see* **Curd**
Chromatography, porous glass, casein micelles, size-fractionation, 19
Coagulation, milk, rennet, casein, effect of **β**-lactogobulin, genotypes, 479
  milk proteins, heated, κ-casein dissociation, influence of colloidal, soluble salts, 523
    casein particles, size, effect of added urea, 39
    κ-casein dissociation, **β**-lactoglobulin, role, 509
    divalent cations, phosphate, behaviour, 29
    genetic variants, composition, effect of, 219
    reducing agents, effect of, 347
Cortisol, milk ejection, effect on, 173
Cream, whipping properties, ultrafiltered milk, 421
Curd, milk, formation, structure, properties, effect of composition, environmental conditions, 303

Disease – *see* **Mastitis**

Enzymes – *see also* individual enzymes
  indigenous, milk, heat stability, 237
Erratum, Journal of Dairy Research (1986) **53** No. 3, p. 392
Ewes *see* **Sheep**

Fenvalerate, ear tags, dry period, subsequent milk yield, 165
Fermented milks, microbiology (review), 559
Flavour, Cheddar cheese, elevated temperatures, ripening, 69
  milk, UHT treated, sterilized, 493
Food, deprivation, milk-secretion, -composition, goat, 153
Forage, pasture, hay, grass silage, milk, late lactation, lipolysis, 13
Friesian cows, milk, lipolysis, 7
Fromase, assay, combined rennets, 407
Furosine, UHT milk, 147

Glyco-phosphoprotein, human milk, 199
Goat, milk-secretion, -composition, effect of food, water deprivation, 153
Gram-negative bacteria, milk, detection, gelation, chromogenic *Limulus* (LAL) assays, 267
  proteinases, assay, milk, 295

Havarti cheese, ultrafiltered milk, different starters, 437
Heat stability – *see also* **Coagulation**, milk proteins, heated
  indigenous enzymes, milk, 237
Heat treatment – *see also* **Sterilization**
  milk, UHT, furosine, determination, 147
    lactulose content, colour, organoleptic quality, 493
    lipolysis, 275
    varying protein, citrate, phosphate, lactulose formation, 207
Human milk, fat, measurement, 487
  glyco-phosphoprotein, 199

Kareish cheese, from ultrafiltered milk, 545

Lactobacillus bulgaricus, temperate phages, infection, 397
β-Lactoglobulin, genetic variants, renneting properties, milk, 479
  role, κ-casein dissociation, milk proteins, heated, 509
Lactulose, content, organoleptic quality, UHT sterilized milks, 493
  heated milks, varying protein, citrate, phosphate, 207
Lipases, milk, psychrotrophic bacteria, 535
Lipids, measurement, human milk, 487
Lipolysis, milk, effect of cow breed, 7
    late lactation, effect of forage, 13
    stored, effect of UHT treatment, 275
Lipolytic bacteria, isolation, enumeration, butterfat agar medium, 413

Mammary gland, progestins, prostaglandin $F_{2\alpha}$, oestrone sulphate, pre partum fluid, goat, 193
Manchego cheese, from ewes' milk, composition, microbiological quality, 551

Mastitis, mice, staphylococci, dissemination, body, 339
Staphylococcus aureus, phage typing, 1
Mechanistic model, metabolism, lactating cow, study, 77, 107, 133
Metabolism, lactating cow, mechanistic model, 77, 107, 133
Milk, coagulation – *see* Coagulation
Gram-negative bacteria, detection, gelation, chromogenic *Limulus* (LAL) assays, 267
human – *see* **Human milk**
quality, effect of peptidases from *Pseudomonas fluorescens*, 283
spoilage, psychrotrophic bacteria, 535
ultrafiltered, whipping properties, cream, 421
water buffalo, progesterone, radioimmunoassay, 471
Milk composition, environmental conditions, effect on milk curd, formation, structure, properties, 303
food, water deprivation, effect of, goat, 153
milk protein genetic variants, heat stability, milk, 219
Milk fat, secretion, pre partum, goat, 193
Milk secretion, goat, ACTH, initiation, gestation stage, pre partum milking, influence, 179
Milk yield, food, water deprivation, effect of, goat, 153
subsequent lactation, after Fenvalerate ear tags used, 165
Montbéliarde cows, milk, lipolysis, 7
Mucor miehei, proteinase, combined renneta, milk clotting activity, 407
Musca autumnalis, control, Fenvalerate ear tags, 165

Oestrone sulphate, pre partum mammary fluid, goat, 193
Oggtt, quality, improvement, 429

Peptidases, from *Pseudomonas fluorescens*, properties, action on milk, 283
pH-dependent, dissociation of micellar κ-casein, 509, 523
Progesterone, milk, water buffalo, radioimmunoassay, 471
Progestins, pre partum mammary fluid, goat, 193
Prostaglandin $F_{2\alpha}$, pre partum mammary fluid, goat, 193

Proteinases – *see also* **Fromase**
cell wall, *Streptococcus lactis*, 247
Pseudomonas fluorescens, heat inactivation, 51
psychrotrophic bacteria, milk, 535
assay, 295
Pseudomonas spp., lipases, proteinases, production, whole milk, 535
P. fluorescens, peptidases, properties, action on milk, 283
proteinase, heat inactivation, 51
Psychrotrophic bacteria – *see also* ***Pseudomonas*** spp., ***P. fluorescens***
milk, 295, 535

Rennet, coagulation, milk, casein, β-lactoglobulin, genotypes, effect of, 479

Sheep, milk, cheeses, Spain, microbiological quality, composition, 551
Spain, sheep milk cheeses, composition, microbiological quality, 551
Staphylococcus aureus, phage typing, subclinical mastitis, 1
ultrasonic-, heat-treatment, combined, effect of, 61
Starters, fermented milks, 559
Sterilization, milk, lactulose content, colour, organoleptic quality, 493
Stomoxys calcitrans, control, Fenvalerate ear tags, 165
Streptococcus lactis, cell wall proteinase, 247

Teat, canal, closing forces, 321
compressive load, teatcup liner, 327

Udder – *see* **Mammary gland**

Vitamin B_{12}, microbiological assay methods, 463

Water, deprivation, milk-secretion, -composition, goat, 153
Water buffalo, milk, progesterone, radioimmunoassay, 471

Yogurt, starter, grown in cow-, goat-milk, aroma, CO_2, 257
Lactobacillus bulgaricus, temperate phages, infection, 397
